

This is a marketing communication. Please refer to the fund rules and consult with the fund manager before making any final investment decisions.

FB Opportunity Fund is an actively managed high risk fund focused on generating maximum returns through complex trading strategies which often include leverage, short-selling and derivatives trading. The Fund invests at least 80% of its assets in the US stock market derivatives. The core trading instruments are options on indices and US Treasuries. The Fund's objective is to ensure long-term growth in the value of assets while maintaining a controlled, well balanced risk level. The minimum recommended investment period is three years.

WHY FB OPPORTUNITY FUND?

1. Relying on tailored investment strategies, the Fund is capable of generating returns both in rising and falling market, as well as in a stagnant market.
2. The Fund is a liquid investment, since an investor can exit the Fund once a month.
3. The Fund is a no-load fund (no entrance or exit fee is charged).
4. Fund uses hedge-fund strategy. The strategy performance (since april 2020) is 104%.

FUND MANAGER'S COMMENTS, 31.12.2024

USA aktsiaturud

Detsembris pöördus USA aktsiaturgude senine tõus languseks, kuna optimism ralli jätkumise osas kadus kuu teises pooles. S&P 500 indeks langes detsembris 2,1%, mis vähendas aasta kogutõusu 22,7%-ni. Ehkki Föderaalreserv alandas intressimäärasid 0,25 protsendipunkti võrra, ei suudetud turuosaliste muresid kõrvaldada, kuna inflatsiooni langus on peatunud ja tööturg püsib endiselt tugev.

Ettevõtete kvartalitulemused olid üldiselt positiivsed, kusjuures 78% S&P 500 liikmetest ületasid analüütikute kasumiprognose ning 65% tulude prognoose. NVIDIA ja teiste tehisintellekti suunitlusega tehnoloogiaettevõtete tulemused kinnitasid sektori juhtivat rolli turukasvu vedamisel. E-kaubanduse sektor teatas rekordilistest müüginumbritest, mis aitas tõsta investorite kindlustunnet.

VIX ehk "hirmuindeks" liikus detsembris 17 punkti juurde, mis indikeerib mõningast ebakindlust tugeva turgude tõusu jätkusuutlikkuse osas. Tehnoloogiasektor jätkas detsembris tugevat tõusu, eriti tehisintellekti ja pilvetehnoloogia valdkonnas. NVIDIA teatatud 120% kasumikasv aastases võrdluses ning mitmete uute investeerimisprojektide algatamine rõhutasid sektori jätkuvat kasvu. Investeeringud USA-sse tehnoloogiaarendusse ulatusid rekordiliste 1,2 triljoni dollarini.

HISTORICAL PERFORMANCE

KEY FACTS

Launch of Strategy	April 2020
Country of incorporation	Estonia
